

Dare to Soar

ISO 19011 Standard for Auditing Management Systems

Quality Strategies International

Course No CBS 05: Duration: 3 Days

This course is approved by South African Auditor Training and Certification Association who is recognised as a Nationally Authority by SANAS. It is essential as a delegate your efforts are recognised by a national body otherwise your qualification is not worth the paper that it is written on.

This International Standard provides the methodology on auditing management systems, including the principles of auditing, managing audit programmes and conducting management system audits, as well as guidance on the evaluation of competence of individuals involved in the audit process including those responsible for audit programme management, auditors and audit teams.

It is applicable to all organizations needing to conduct internal or external audits of management systems.

The application of this International Standard to other types of audit is possible, provided that special consideration is paid to the specific competences needed.

Managing the Audit Programme	Preparing for the audit activities
Establishing the audit programme	Conducting the audit
Implementing the audit programme	Preparing and distributing the audit report
Audit programme monitoring	Completing the audit
Reviewing and improving audit programmes	Conducting audit follow-up
Audit activities	Competence and evaluation of auditors
Initiating the audit	SAATCA & SANAS

The course outcome through the application of detailed case studies will enable participants to plan and implement Internal, Supplier management and Certification audits. The case studies provide as much simulation to an actual audit process as is practically possible, and includes extensive syndicate exercises and group work. This course is suitable for those organisations such as Manufacturing, Construction, Service, Healthcare, and Hospitality Industries. Cross functional auditing provides additional benefit is derived in training all functional areas: Environmental, Risk, Quality, Health and Safety, HR, Finance, Information Technology, Marketing Departments, all Process Owners and Departmental Managers.
